DAILY PITTSBURGH GAZETTE.

SATURDAY AFTERNOON, DEC. 21, 1833.

☞THE MAIL.—We received no papers from Washington city, this morning; of course we have nothing later from Congress.

GEN. M'KEAN AND THE NATIONAL CONVENTION.—Our readers will find in our paper, to day, the letter of our new Senator, expressing, without equivocation, or mental reservation, his disapprobation of a National Convention and its specific object—the election of Van Buren.

It was only yesterday that the Mercury asserted that Gen. M'Kean was favorable to such a Convention.

THE JUNCTION CANAL.—We publish, to day, the interesting Report of the Philadelphia delegates to the Warren Convention, made to the Board of Trade, in that city. Those delegates seem fully impressed with the importance of that great improvement, and the publication of their Report, by order of the Board of Trade, now consisting of six hundred merchants, will tend to produce a general conviction in the minds of the citizens of that place, of the necessity of its completion, and that at an early date.

New Post Office.—A new office has been established at East Liberty in Pitt Township, called "Wilkins Post Office," and *Lewis Fluck* appointed Post Master.—*Democrat.*

New County.—We deem it our duty to apprise the public of the fact that numerous petitions in favor of a new county, to be formed of portions of Allegheny, Westmoreland, and Washington counties, have been presented to the Legislature—and that a BILL has been reported by the Committee to whom the matter was referred, to erect a new county, as above, to be called *Carroll!* Is it not proper that the citizens of this county should hold a meeting on the subject—and adopt measures consonant with their views. No measure, of such importance, ought to be entered into *precipitately.* We have no doubt the representatives from this county would be indebted to their constituents for a frank avowal of their sentiments on this subject. An unequivocal and public expression of opinion, would therefore, be expedient. We respectfully suggest the propriety of a county meeting being convened at an early period. Unless something is speedily done, our *inertness* would indicate a disposition to permit the passage of the act.—*Allegheny Democrat.*

To the Editors of the American Sentinel.

Gentlemen—Truly sensible of the limited importance due to my opinions on the prominent topics which are beginning to agitate the public mind in reference to the ulterior results, I unfeignedly regret the necessity of thus, under my own signature, contradicting an assertion calculated to exhibit me to public view as vacillating upon a point on which I supposed there could be no doubt—I allude to that portion of a letter purporting to have emanated from a responsible source at Harrisburgh, and published in a Philadelphia paper of yesterday, stating that I am in favor of a National Convention for the purpose of nominating a candidate for the next presidency. The assertion is wholly gratuitous and without foundation. In reference to that subject, I have held but one language at all times, on all occasions, and to all persons, whether friends or opponents: *I am, and always have been, decidedly and unequivocally opposed to this singular innovation upon the established usages of the democratic party, and adverse to the consummation of the single and special* object intended to be accomplished by it. In haste, I am your obedient servant,

SAMUEL M'KEAN.

Washington City, Dec. 15, 1833.

From the Philadelphia Commercial Herald.

PHILADELPHIA BOARD OF TRADE.—A special meeting of the Philadelphia Board of Trade was held on the 16th inst. at the Merchants' Coffee House, to receive the Report of the Delegates to the Warren Convention, *Thomas P. Cope*, Esq., President of the Board, in the Chair.

At a meeting of the Board of Directors, held on the 11th inst., it was unanimously

Resolved, That the thanks of the Board of Directors be presented to the Delegates to the Warren Convention, for the able and satisfactory manner in which they have discharged the duties committed to them, and that their Report be referred to a Committee to present the same at a special meeting of the Association, to be held on the 16th inst.

General Patterson, Chairman of that Committee, presented to the Chair the Report of the Delegates, which was read, and is as follows:

The Delegates appointed to represent the City and County of Philadelphia in the recent Convention held at Warren, Ohio, respectfully submit herewith to the Board of Trade a statement of their proceedings. In the selection of materials for the present Report, much embarrassment has been experienced from the number and variety of topics suggesting themselves for consideration, which it was yet impossible to present, even in moderate detail, without swelling this communication beyond its proper limits. As many of these however, are believed to have an important bearing upon the interests of our City and State, they will form the subjects of distinct statements to be appended to this report, or, to be hereafter separately submitted.

Agreeably to the expressed wishes of your Board, that the Delegation should obtain whatever information might be found practicable in their journey through Pennsylvania, respecting the state of our public improvements, and the degree of reliance which could be placed upon them as a medium of communication for the ensuing season, they proceeded to Pittsburgh by the northern rout, which leads for a considerable portion of the distance immediately along the line of the Western Canal. At Harrisburgh they had an interview with the Governor and Canal Commissioners, who manifested a deep interest in the objects of the Convention, and readily furnished the desired information upon various points of enquiry.

From the results of their observations in their tour to and from the west, the delegation are happy to state that they have been, on the whole, highly gratified with the present appearances of the public works; as it respects their good order and general character of stability, it is highly satisfactory in view of our present wants and interests to know that we are in the actual enjoyment of a line of Canal, connecting the Eastern and Western waters of our State, adequate for all the purposes contemplated in its formation, and to which time is daily adding increased permanency and strength. To the excellence of the Portage Rail Road across the Allegheny ridge, your delegation can especially bear unhesitating testimony; the work may be regarded as furnishing the most effectual communication between the two divisions of the Canal, which circumstances admit, and in its execution is highly creditable to the Engineers, under whose supervision it has been placed. In passing over this interesting and important section, and in witnessing the triumphs which skill and perseverance have gained over the obstacles of nature, by thus opening safe and easy channels to commerce, through the wildest defiles and most rugged fastnesses of our majestic mountains, the impression could not be resisted, that the present generation had not only opened for themselves new sources of prosperity, but that, they would be bequeathed to our descendents to be cited in the future History of Pennsylvania, as monuments of bold and energetic, as well as successful achievements.

At Pittsburgh, the delegates were joined by a highly respectable deputation from that city and the county of Allegheny, and descending, in company, the Ohio River to Beaver, they reached Warren on the evening of the 12th November.

Upon the morning of the ensuing day, the Convention, consisting of one hundred and nine members, was duly organized, and proceeded at once to the consideration of the important objects of its assemblage, viz:—to decide upon the most eligible mode of uniting the public works of Pennsylvania with those of the State of Ohio, and to fix the most suitable point of junction.

Three different methods for forming the proposed connection were presented.

1st. A canal commencing at Akron on the Ohio Canal, and passing the summit at Ravenna, by the valley of the Mahoning, to meet the termination of the Pennsylvania improvements, at or near N. Castle.

2d. A Rail Road from Massillon, on the Ohio Canal, to the mouth of little Beaver, or by a continuous line to Pittsburgh.

3d. A Canal from Bolivar, on the Ohio Canal, by the rout of Sandy Creek and Little Beaver, to unite with the Pennsylvania Canal Basin at the mouth of Big Beaver.

The merits of these several plans were explained with much ability and zeal by their respective advocates, and valuable information furnished respecting the character and products of the different counties in the vicinity of the lines of junction under consideration. As is already known to your Board, the task of selection from the various routs was finally devolved, by an unanimous vote of the Convention, upon a Committee consisting of the Delegates from Philadelphia and Pittsburgh. This mark of confidence, joined to the deep interests which the City of Philadelphia as well as the State of Pennsylvania had at issue, upon a judicious choice of the place and mode of connection, imposed upon the Committee the new and unexpected duty of making a personal examination of the specified lines, and they commenced the undertaking immediately after the adjournment of the Convention. This took place on the 15th ultimo, after a session of three days, marked through its whole course by the manifestations of mutual respect, and courtesy and kindness among the Delegates. The importance attached by the citizens of Ohio to the deliberations and action of this convention may be inferred from the numerous representation from the various counties whose interests were supposed to be more directly affected by the choice of a connecting rout, and especially from the high character of the gentlemen deputed as their Commissioners.

Of the result of a faithful and impartial examination of the proposed modes of connection, the Board have been apprised by the published document, signed by the Delegates from Philadelphia and Pittsburgh, a copy of which, marked A. is herewith subjoined. It is only necessary to add, that in the choice of a Canal by the Mahoning rout, there was a unanimous and undoubting concurrence, and they unhesitatingly recommend this line of junction to their fellow citizens, as that upon which their attention and efforts should be concentrated. The soil and character of the ground through which it passes are eminently favorable, the supply of water abundant, and the cost of construction alike moderate, and of definite calculation.

The advantages of the contemplated connection with the Ohio Canal may be gathered from the following facts, which although presented, as your Delegation propose to state them, in the simplest language, cannot fail to establish the importance of immediate and decisive action in relation to the important subjects which they involve.

1st. The junction Canal will open at once to Philadelphia, the trade of the interior of Ohio, and of the Upper Lakes, from both of which it is now almost wholly debarred for the want of the means of communication. Any estimate of the importance of the Lake trade, formed upon present data would be delusive, inasmuch as the Territories bordering upon them are of comparatively recent settlement, and they are just now rising into importance. It may be well to state, however, that the interior of Illinois is already reached through the waters of Erie, Huron and Michigan, and the contemplated chains of connection with them by Canals and Rail Roads through that State, Indiana and Missouri, demonstrate with unanswerable force the necessity of a connecting line, uniting our improvements with Lake Erie, at the most advantageous point. Upon such a junction being effected, by means of an union with the Ohio Canal, the City of Philadelphia will enjoy the advantages of a communication with the Lakes, by a rout at least one hundred miles shorter than from New York to the same point, and by a safer and more certain channel. To this valuable trade, there will also be a ready access at seasons of the year when the avenues of communication with our sister City, are closed by the higher Northern latitude of her Canals. From information derived by your Delegates, in their late journey, it appears that the harbor of Cleveland opens, upon an average, at least, by the first of April, while that of Buffalo remains closed five or six weeks beyond this period. During this interval, there is an uninterrupted navigation of the south western portion of Lake Erie, and at a season when it is of the first importance to the agriculturist that he should have an access to an Atlantic market for his produce, accumulated during the winter, and of equal importance to the merchant, that he should obtain his spring supplies of goods. The causes of the later obstructions of the harbor of Buffalo, and consequently of the New York Canal, may be readily perceived from the fact that that port is situated nearly a degree and one half northward of Cleveland, and more especially from the formation of the Lake, which, in consequence of its narrowing towards the Niagara river, causes an accumulation of the ice at that point, which is brought by the wind and current of the Lake from the upper waters of Superior, Huron, and Michigan. The same superiority of relative position will accrue to our City in regard to a communication with the interior of Ohio, with this important additional fact: The evils of a delay of access to an Atlantic market are enhanced in proportion to the more southern location of any section interested; inasmuch as in the case of all articles of a perishable nature, as are some of the chief staples of Ohio, the necessity is imperative, either of a risk of a total loss of property, or of an abandonment of some of the most profitable articles of production and export.

2d. It is a matter, beyond all dispute, that the projected extension of our Canal communication to the Ohio improvements, will secure to us the means of retaining the trade of the southern portion of the Valley of the Mississippi, including the entire West, now supplied by means of the Ohio river; the loss of which must be expected to ensue, if prompt and vigorous measures are not at once adopted to open channels of conveyance of goods at the seasons of a low stage of water in the Ohio, which offers at present our only mode of conveyance from Pittsburgh. This imperfect supply of water occurs usually at the season of our most active fall trade, and although it is freely admitted that the communication is not always suspended, even during this season, yet the distressing uncertainty relating to it will, on the principles of common prudence, forbid a dependence on such a mode of transportation, when more certain channels are of easy access.

It appears to your delegation a consideration of prime importance, that our fellow citizens should be awake to the fact that the proposed junction is not a measure providing simply for greater convenience of transportation; nor one of mere enterprise, justifiable and praiseworthy, perhaps, other circumstances being favorable, for the enlargement of the sphere of our mercantile operations; but as a measure of necessity, of strict self defence, and indispensable to the retaining of the portion of the western trade we now possess.

Whatever this trade is worth to the city of Philadelphia—whatever employments it gives to the industry of its mechanics, its artisans, and its merchants, it should enter into the estimate of the importance of an effort to retain it.

The disadvantages under which Philadelphia at present labors, for want of a certain communication with the west, would indeed be as gloomy as they are prominent, did we not possess the sure means of providing a remedy, which will not only supply our present deficiencies, but lead to the attainment of new and additional advantages.

From Philadelphia to Akron, the proposed point of junction with the Ohio canal, the distance is less by about two hundred miles than from New York. The transportation of merchandise, unattended with the risk and delays incident to the Lake navigation; and finally, at a cost of conveyance less than by any other channel. Nor should it be regarded as a matter of inconsiderable importance that the proposed canal insures a medium of communication between the east and the west available, alike in peace or war, and free from the exposure of passing the territories of a foreign power, possessing the whole northern shore of Lake Erie.

It is proper to state the unanimous conviction of the Delegation, that any plan of communication will but imperfectly secure the anticipated advantages, which does not contemplate an unbroken communication from the western base of the Allegheny to the Ohio Canal; and by that means avoiding the expense and delay of transhipments. This will involve the necessity of an extension of the Canal from Allegheny town, to meet the excellent Beaver Canal, already completed at Brighton, a distance of about twenty eight miles, and which may be passed on a single level.

The promised advantages to be afforded by this Canal, are an entire connected communication from the city of Philadelphia, by the Columbia Rail Road, or by the Schuylkill, Union, or Pennsylvania Canals, to any point on the Ohio Canal, and at all stages of the water of the Ohio River at Portsmouth, and to Lake Erie by Cleveland, to open to the citizens of Philadelphia a new and extensive trade to the States of Ohio, Indiana, Illinois, and Michigan, and present a communication to a market for the trade of the western part of Lake Erie a month earlier than it could be reached by any other channel; its further advantages would be an immediate increase, and at no distant day doubling the tolls of the Schuylkill, Union, and Pennsylvania Canals; from this immense trade passing along their shores.

The ways and means necessary to accomplish this desirable object, your Delegation leave to your respectable body to point out, as more properly belonging to them; but they cannot suffer themselves for one moment to believe that funds will be wanting to complete a work which is calculated to enhance the value of every house and lot in the city, and to augment, to almost an incalculable degree, the commerce and wealth of every man engaged, either directly, or indirectly, in the prosperity of Philadelphia.

On motion of M. Newkirk, Esq., it was unanimously

Resolved, That the Report of the Delegates to the Warren Convention be accepted, and published in the daily papers, and that one thousand copies be printed in pamphlet form, for the use of the Association, and citizens generally.

WHERE THE SHOE PINCHES.

It is altogether too late now, to be disputing about the ability of the United States Bank and its Branches to stand the shock of removing the government deposits.

On the contrary, it has been officially announced by the kitchen cabinet, that *they cannot protect the community against the mammoth*, any further than to the extent of the million and a half of treasury checks, lent to the deposit banks in our large cities.

The truth of this matter is, that the United States Bank, being a sound and well managed bank, could not be destroyed nor overturned by the kitchen cabinet, though they tried with all their might to do so, regardless of the evils which would have ensued in consequence, to every man who owes money.

Those very *attempts* which they have made have created a terrible commotion in the money market, all the evils of which fall upon the poor, and upon the men of small property and large business.

It is idle to talk about breaking up a great monied institution, and thereby relieving the burdens of the middling and poorer classes.

Supposing for a moment that the United States bank stock were all owned by half a dozen rich men. You take away their charter, and they are no longer a bank. But what then? It does not make them poor men. Their money, which was loaned out as from a bank, must all be collected, and the merchants, and mechanics, and farmers, who borrowed it, must either borrow elsewhere to pay it, or else sell off their ships, and stock, and land, to raise the money. They will choose, of course, to borrow elsewhere. And their want of money will raise the rate of interest. Of this pressure these same rich men will take advantage, and *rich men only* can take advantage of such a state of things. It is a state which no *poor man* who is *honest*, and who has his senses, would ever desire to bring about. A man who lives on office, and fattens at the public corn crib, may care nothing about it, any further than it may keep him in power and place. But to the numerous business men, who owe the money to the rich half dozen, it is a very serious matter, and cuts up many of their schemes of money making, by the roots.

Let every man who owes money, and who finds it hard to collect, and harder to borrow, think on these things. Let him think them over soberly, and then say, whether every *sqaall* which is raised in the money market, does not *blow him trouble*, while it blows more riches into the pockets of him whose pockets are already well lined.

Let him ask himself, who is benefitted? and who are injured? by vetos, and by removals of deposits.

Whom do they benefit?—Answer, a few banks—and perhaps a few brokers—but chiefly a knot of stock jobbers in and about Albany and New York.

Whom do they injure?

Do they hurt the foreign stockholder? He will lend his money to some of the States, and get his nterest then, the same as now.

Do they hurt the overgrown capitalist? He can vest his money elsewhere. He knows a thing or two about his own interest, and will look out well for it.

Do they hurt the bank? Just so much as they injure the income of the Bank, they injure the poorer class of its stockholders, whose little all is vested there, and who have no other money, by which they can take advantage of the troubled waters.

But do they hurt every enterprising man in the community, who is not rich? Yes:—by taking away his advantages, and bestowing them upon those who are rich enough to be money lenders—And here is where the shoe pinches.

Important.—We learn by a passenger arrived in the Schr. Fornax, on Saturday, from Jamaica, that the Governor of the Island had dissolved the Provincial Legislature in consequence of their refusal to pass the necessary laws to carry into effect the act of the British Parliament for the emancipation of the slaves. The Governor had sent munitions of war, and provisions in vessels of war, from Port Royal, to the different ports in the Island, anticipating a revolt on the part of the negroes. He had expressed to the Asembly his determination to rest on security of the troops of the line, which had been reinforced, and on one portion of the militia, alluding, of course, to the whites. Several families had made arrangements to avail themselves of the first packets for this port.—*New York paper.*

The Navy Report, shows the whole number of officers of our navy, under warrants and commissions, is about 1000, maintained at an expense of $850,000. The seamen are about 5,000; expense, $1,130,000. Expense of the Marine Corps, exclusive of barracks, &c., $190,000. Expenses on all the Navy Yards last year, exclusive of dry docks. $360,000; on the docks (at Charleston and Norfolk) $180,000. The live oak lands belonging to government are said to be increasing in value.—*Poulson.*

American Literature.—There have been published, of Grimshaw's History of the United States, sixty five thousand copies; of his History of England, forty two thousand; of the History of France and Life of Napoleon, by the same author, each six thousand; and of the History of South America, five thousand.—*Poulson.*

An ingenious mode of advertising for a husband.—We copy the following advertisement from the N. Y. Standard:—

To Single Gentlemen.—A respectable young widow, having more room in her house than is necessary for her own family (without children,) is desirous of receiving as a boarder a middle aged gentleman of unquestionable respectability and domestic habits, and who would make himself agreeable as a friend and companion. A note with name and address, sent to L. M. D. at this office, will receive prompt attention.

The New York American, of the 16th, furnishes the annexed information.

"In order to satisfy an inquirer, we have, in addition to the general statement from the National Gazette, published on Saturday, ascertained the following facts respecting the state of the Branch here:

On 1st Oct. its domestic bills of Exchange were	$883,000
Dec. 12th,	709,000
Decrease in 2 1-2 months by the arrival at maturity of these bills,	174,000
On 2d Oct. its specie was	2,540,000
On 22d Dec.	2,080,000
Decrease in specie	460,000

Thus we see, that in this period the Bank has paid out in specie nearly half a million of dollars, while during the whole time the State Banks were indebted to it on an average from 4 to $600,000!"

The period is at hand when our navigation will be suspended, and already the business of transportation from this district, may be said to have ceased for the season. The amount of shipments from the several Anthracite Coal Districts of Pennsylvania, appear to be, in round numbers, as follows:—

Schuylkill Coal Region,		218,000
Little Schuylkill,	do.	37,000
Lehigh,	do.	123,000
Lackawana,	do.	112,000
Total,		490,000

The aggregate amount therefore is four hundred and ninety thousand tons—Two hundred and fifty five thousand tons of which were sent to market from the Schuylkill Coal Region. This, estimating the value, clear of toll and transportation, at three dollars per ton, is equal of a return of seven hundred and sixty five thousand dollars to this Coal Region, and the value of the aggregate amount delivered at the markets of Philadelphia and New York from the Coal Regions of Pennsylvania, estimating the same at four dollars per ton, is equal to *one million nine hundred and sixty thousand dollars.—Miner's Journal.*

HARRISBURGH, Dec. 14.

A long and interesting debate took place upon the subject of allowing votes by proxy, in choosing directors of corporated companies. The subject thus made general, originated from a motion of Mr. Keating, to insert in a bill (what had yesterday been stricken out, on motion of Mr. Goodman) to incorporate the Wissahickon Turnpike Road Company, the privilege of voting by proxy.

Mr. Ayres, of Harrisburgh, first called in question the motives of the Governor, in his recommendation of this subject to the attention of the Legislature. He had proceeded so far as to state, that the family of the Governor was somewhat interested in the late changes made in the Harrisburgh Bank Officers, (the cashier and some of the under officers having been dismissed) when he was called to order by the Speaker. Properly there could have been no reply to this, it being irrelevant to the subject of debate, but Mr. Thompson volunteered himself, and commenced a tirade, in exoneration of the Governor, which, had the Governor been present, he would not have thanked him for. Mr. Stevens replied to Mr. Thompson, and he "done up" Mr. T. in fine style, besides treating the subject in a masterly manner. I have rarely seen a sarcasm more powerful. Not a member of the House, upon any consideration, would have changed places with Mr. Thompson. He asked Mr. S. if he challenged him to a defence of the Governor, and wished to try weapons with him upon that subject. Said Mr. Stevens, "I never challenge where I *am sure of being foiled.*" The *manner* of this was annihilating—it raised a most marked contrast between the two, in the minds of every one present. But the *subject* of proxies was also ably discussed, not only by Mr. Stevens, but by Messrs. Keating, Weigand, Holcomb, and Walker. It was generally contended, that the Governor hastily made the recommendation, probably (as Mr. Stevens said) from local excitement having reached him; that the abolition of proxies affected a man's right of doing with his own property as he pleased; that it, in some measure, would have a retroactive effect; and that it would have a bad effect upon stocks, either existing or to be created. Mr. White had taken the floor, but gave way to a motion of adjournment. Several petitions have been presented for a new Bank at Harrisburgh, arising from the difficulty between the officers and directors of the present Harrisburgh Bank.—*Poulson.*

FAIRBANK'S PLATFORM SCALES.

THESE scales are constructed upon an improved principle; are fitted up with great care by the manufacturers, and warranted to weigh with accuracy from half a pound to 12,000. Being placed in, and forming part of, the floor, the process of weighing is performed with ease and facility, while the space they occupy may be improved as a passage way or for other purposes.

The construction of these scales is such that they are little liable to derangement of wear, and their perfect operation will be guaranteed for any reasonable length of time.

The usual objection, that a new method of weighing cannot be safely entrusted to unskilful hands, is obviated by the use of the improved BALANCE, concerning which are the following remarks in the Journal of the Franklin Institute, of the state of Pennsylvania, for the promotion of the Mechanic Arts, for June, 1833. (Edited by Thos. P. Jones, M. D., late Superintendent of the Patent Office, at Washington, Professor of Mechanics in the Franklin Institute, &c.

"The Messrs. Fairbanks, some time since, obtained a patent for a Platform Weighing Machine, and this mode of adjuating and graduating the Beam of the Balance, and the weights, was devised by them with a view to its employment with the before mentioned machine. We have had an opportunity of examining one of their balances, and have been much pleased with it: this examination, however, was not necessary to the conviction that it possesses a just claim to the character of a real improvement, the whole arrangement being so simple as to enable any person to perceive that it is well adapted to the purpose contemplated, that of facilitating the business of weighing, and more especially of heavy articles."

The subscriber, as Agent, will receive orders for the above Scales, which will be made in this city to order. They can be seen at his Warehouse, No. 84, Front street.

Nov. 8, 1833. MOSES ATWOOD.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40
other lots, containing about			6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county—and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others—a soil rich and productive—the neighborhood abounding in coal—well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

DOCTOR ROBERT'S

☞*WELCH MEDICAMENTUM.*☜

FOR the cure of Dyspepsia, Liver Complaints, Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

UTICA, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer s vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

GEO. W. CARPENTER'S

COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradually increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.
